

Installation instructions

1 Cutting and preparation for installation of SmartVP in the façade insulation system

- The ventilation duct is cut, and the ventilation guide is prepared for external outlet.
- Apply the plaster and then press the SmartVP into place in the ventilation tube
- The profile is subsequently covered with plaster. Follow the supplier's instructions.

2 Installation of SmartVP profile in the façade insulation system

- Apply reinforcement nets and plaster. Follow the supplier's instructions.
- Apply finishing plaster. Follow the supplier's instructions.
- Clean the SmartVP vent duct for impurities and apply silicone sealant at the junction between the vent pipes and the SmartVP pipe connection edge.
- Insert ventilation grille.
